

MAKSYM KOZLOV

PYTHON DEVELOPER

[PYGERETMUS.GITHUB.IO/PORTFOLIO/](https://pygeretmus.github.io/Portfolio/)

SKILLS

Including commercial experience (1 year):

- Python - 3 years
- Django - 2 years
- AWS - 2 years
- Telegram Bot Api - 2 years
- Git, Github - 3 years
- SQL - 3 years
- Docker - 2 years
- Celery - 1 year
- Redis - 1 year
- Stripe - 1 year

Non-commercial:

- FastAPI - 1 year
- HTML, JS, CSS - 0.5 year

EXPERIENCE

Junior Python Developer

Solidway

10/2023 - Present

- Developed django applications for 10+ projects.
- All of them covered with tests and documentation.
- All of them deployed at AWS using the following services: for databases RDS and ElasticCache, S3 for object storage, ECR and Docker for container storage, EC2 and ECS for computing power.
- A few projects have CI/CD (developed by me) using Github Actions > AWS ECR > AWS ECS.
- Half of these projects use celery as task queue.
- A few projects have subscription functionality using Stripe service.
- Several projects have telegram bots management.

ACHIEVEMENTS

Certifications:

- [AWS Certified Cloud Practitioner](#) - learned about 50+ main AWS services.

Internships:

- Meduzzen - developed FastAPI project with Docker, connection to AUTH0, and pytest.

Languages:

- English - B1-B2
- Ukrainian - Native
- Russian - Native

ABOUT ME

After all this information let's talk about me)

I am a programmer with a year of commercial experience, young, fresh (not burned out yet!), full of maximalism and new ideas (for some this may seem excessive, i hope you will appreciate it).

I do programming because I like it, I like the challenge, the complexity, the constant learning of something new. Do you think that I can get bored on your project? Believe me, just as there is nothing more eternal than the temporary, there is nothing crazier than a big project in which you need to "change a little bit".

I will be glad to cooperate!
